OPPORTUNITY STAGE VALIDATION

Script Type:	DocType Event
Reference Document Type:	Opportunity
Event Frequency:	All
DocType Event:	Before Save

Script

```
if doc.sales_stage:
    # 1. Fetch the Sales Stage document to check the New/Existing group
    stage_doc = frappe.get_doc("Sales Stage", doc.sales_stage)

    # 2. Determine the expected group (New Lead vs Existing Customer)
    expected_group = "New Lead" if doc.opportunity_from == "Lead" else "Existing Customer"

    # 3. Check: Does the stage match the Lead/Customer type?
    if stage_doc.custom_sales_group != expected_group:
        frappe.throw(f"Invalid Stage: The stage '{doc.sales_stage}' is only for {expected_group}s.")

    # 4. Regional Prefix Validation (Combined Sun, Moon, Star)
    # Define which region requires which prefix
    category_prefixes = {
        "Sun": "Sun",
        "Moon": "Moon",
        "Star": "Star"
    }

    # Get the required prefix for the selected category
    required_prefix = category_prefixes.get(doc.custom_customer_category)

    if required_prefix:
        # Check if the stage name starts with the correct regional prefix
        if not doc.sales_stage.startswith(required_prefix):
            frappe.throw(f"Error: Stage '{doc.sales_stage}' is not valid for the {doc.custom_customer_category} region. Please select a stage starting with '{required_prefix}'.")
