```
# =====
# AUTOMATE PRODUCTION STATUS BASED ON PAYMENT & TERMS
# =====

# 1. Initialize Flags
is_credit_customer = False
has_payment = False

# 2. CHECK PAYMENT TERMS (Case Insensitive)
# Check the Template Name (e.g., "Credit 10days...")
if doc.payment_terms_template and "credit" in doc.payment_terms_template.lower():
    is_credit_customer = True

# Check the specific Schedule rows (fallback)
if not is_credit_customer:
    for row in doc.payment_schedule:
        # Check description like "Credit 30 Days"
        if row.description and "credit" in row.description.lower():
            is_credit_customer = True
            break

# 3. CHECK ACTUAL PAYMENT
# If 'Advance Paid' is greater than 0, consider it paid/confirmed
if doc.advance_paid > 0:
    has_payment = True

# 4. SET STATUS
# Rule: If Terms are Credit OR Payment is made -> Confirmed. Else -> Draft.
if is_credit_customer or has_payment:
    doc.custom_production_status = "Confirmed"
else:
    # Revert to Draft if conditions are lost (optional, keeps data clean)
    doc.custom_production_status = "Draft"
```
