

SERVER SCRIPT

FORCE DELETE

Script Type: API
Event Frequency: All
DocType Event: Before Insert
API Method: force_delete_fix

Script

```
doc_name = "MAT-STE-00069"

try:
    # STEP 1: The Trick
    # We force the system to think this document is a "Draft" (0).
    # This bypasses the broken 'Cancel' logic entirely.
    frappe.db.set_value("Stock Entry", doc_name, "docstatus", 0)

    # STEP 2: Delete
    # Now that it's a draft, we can delete it safely.
    frappe.delete_doc("Stock Entry", doc_name, force=1)

    frappe.response['message'] = f"✅ SUCCESS: {doc_name} was neutralized and deleted."

except Exception as e:
    frappe.response['message'] = f"❌ Error: {str(e)}"
```
